

Iso-Tray™

Draw Blood in Isolation Rooms Safely

Phlebotomy In Isolation Rooms

Iso-Tray™ is a disposable phlebotomy tray for carrying blood drawing tools and accessories into isolation rooms where contamination risks are high.

Features & Benefits

- 2 dedicated spots for blood culture tubes
- 10 dedicated spots for blood sample tubes
- Iso-Trays store flat - requires less space and has interlocking flaps for easy assembly.
- Iso-Trays are made from sturdy paperboard, a renewable resource.
- Central for all other blood drawing supplies.
- Everything you need for drawing blood in a container that can be placed in the isolation room for returning usage or disposed before leaving.
- Reduces the risk of contamination by reducing the number of times phlebotomist need to enter and exit the isolation room.

Disposable

Reduces the risk of contamination

Economic

Practical

Everything you need for drawing blood in the isolation room for continual usage or disposal before leaving.
